
[Zinc Oxide Catalyst](#)

Zinc Oxide Catalyst

As an experienced zinc oxide catalyst manufacturer and supplier, we provide a wide range of products for customers to choose from. Some of our most popular zinc oxide catalysts are listed below

1. Zinc Oxide Catalyst T-22

The zinc oxide adsorbent is designed for deep desulfurization of liquid propylene and industrial feed gases at ambient temperature.

Form: extrudates, 4mm

2. Zinc Oxide Catalyst T-80-3

T-80-3 has good desulfurization activity at room temperature and the desulfurization rate can reach 99.5%.

Form: spheres, 3-5mm, extrudates, 4mm

3. Zinc Oxide Catalyst T-90

It is used for sulphur removal and is suitable for deep purification cases, especially those at higher temperature (350-400°C).

Form: extrudates, 4mm

4. Zinc Oxide Catalyst T-95

It is an ideal desulfurization adsorbent for feedstock purification processes, which is widely used in production of hydrogen, ammonia, alcohols and organic chemicals.

Form: extrudates, 4mm

5. Zinc Oxide Catalyst T-95-3

It is ideally suited for removal of hydrogen sulfide from natural gas, oil gas, refinery gas, coke oven gas and light oil feedstock. Form: extrudates, 4mm

6. Zinc Oxide Catalyst T-AC-1

It is used for deep desulfurization of liquid propylene, industrial feed gases and biogas at ambient temperature. Form: extrudates, 4mm

In addition to zinc oxide catalyst, we also offer methanation catalyst, ammonia catalyst, alumina support ball, and more. As our products are manufactured using superior materials and advanced technologies, they are high quality and environmentally friendly. This, coupled with their competitive prices, has made our products very popular with customers from Britain, Germany, Kuwait, Saudi Arabia, Iran, Syria, Jordan, Korea, New Zealand, Thailand, Indonesia, among other countries.

If you are interested in our products, please feel free to contact us. Our staff is looking forward to serving you.
